

ALERT NOTIFICATION!

California Faucet Adapters NOW Included w/HT4105!

BTI Valued Customer,

Our 'Next-Generation' Digital Instant Hot Water Dispenser-HT4105 is compatible with all other brands of faucets, other than the *Insinkerator/Dornbracht*.

The compatibility feature, along with an *Industry Best 5-Year Warranty*, makes the HT4105 a perfect solution for *New Construction, Remodels & Replacements!*

BTI has been including additional adapters to provide ease in compatibility with most other faucet brands. It came to our attention that some markets had challenges finding adapters for compatibility with *California Faucets*. No more such challenges.

**** Customized adapters for California Faucets now included & in stock!**

Our BTI Aqua-Solutions family wishes to extend their sincere appreciation for your support & patronage over the last year . . . Cheers to our future mutual-success!

* Updated 'Installation-Addendum' will continue to be inserted in each HT4105 (see below)

ATTENTION PLUMBER/INSTALLER

Blue Inlet On Top Of BTI Dispenser
Only Signifies **Cold-Water** In
Red Outlet On Top Of BTI Dispenser
Only Signifies **Hot-Water** Out

CAUTION!!! Read Following Carefully

Several other brands of faucets use different colors of supply tubing that include **Blue/Red/Black**. That does not mean the faucet **Blue/Red** tubing actually connects to the **Blue Inlet/Red Outlet** on the BTI dispenser.

Most other brands use the **Blue/Black** Tubing to connect to the Cold-Water Supply or Filtration System. **Red** Tubing connects to **Blue Inlet** on top of BTI Dispenser.

Be sure to properly identify the tubing use for your particular brand of faucet before installation.
