How to choose your Miroir BROT[®] mirror?

A Magnifying (or Cosmetic) mirror is a tool that possesses a molded glass or a machined glass to provide a magnifying reflected image.

The magnifying mirrors are available in different forms (round, oval or rectangular) and under different functionality (lighted or unlighted).

Where?

For a good use of a magnifying mirror, the user should stand at about 15-25 cm of the mirror.

We do recommend a fixation at 1m50 (4' 11") – 1m55 (5'1") from the floor (French average).

- **Bathrooms/restrooms sinks**

- most of the time wall-mounted
- swivel, single arm and double arms

The swivel mirrors are used when you have a limited space

The single and double arms mirrors are on the left or right side of the wall mirror.

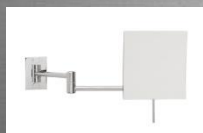

- **Bedrooms, a dressing table "Coiffeuse"**

- as dressing table, the perfect make-up tool

Lighted or Unlighted?

or

- A room that benefit from natural daylight does not require a lighted mirror

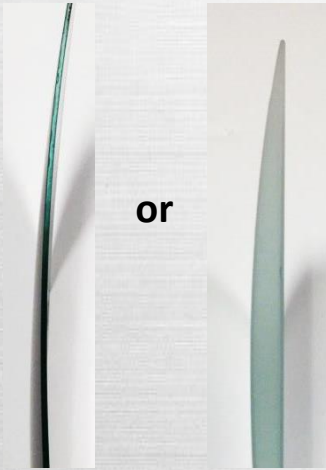

- It is recommended to position the dressing table close to a window to obtain a good quality of light

- The compact fluorescent bulbs specially adapted for a smooth but effective light. This allow the user to use it without being dazzled

- The LED light is white and have an higher intensity

How to choose your Miroir BROT® mirror?

The type of glass and magnification?

Miroir Brot® offer two types of magnifying glass

- The standard magnification glasses are made with the silvered glass shaped. The magnification is obtained by molding the glass concavely.
- The optical glasses are manufactured with a high quality glass extra clear. The magnification on this type of glass are obtained by a machining process used also for microscopes and telescopes lenses

The choice of magnification is personal, everyone finds his own comfort but we recommend :

- For **shaving**: a magnification 3X or 5X
- For an **everyday makeup**: a magnification 5X, Optical 30, Optical 70
- For **facial care**: a magnification Optical 70, Optical 7X, 9X

Design?

Miroir Brot® has a large adaptable range of products for different interior designs

- « **Retros** » model with his classic and elegant design goes into the **Brot® tradition**
- The **contemporary decorations** integrate our range of mirrors «**Classiques**», its simple curves and elegance shall slide to your interior.
- For an **urbanist decoration**, we recommend our line of mirrors «**Urban**» that include models with masculine character and design.
- Miroir Brot has also fulfilled models for **modern decoration** with his «**Design**» line, this refined line keep the elegance and the know-how of the Miroir Brot

Finish color?

The finish color of your mirror is often defined by your interior fittings of your bathrooms. So if your decoration is composed by accessories in chrome, choosing of chrome mirrors is recommended.

- Our mirrors are available in **Chrome, Nickel, Gold and Satin Nickel**.

Concerning the dressing table top mirrors, the choice of the finish color will depend of your interior design or your taste.

- The light (cold) colors, more in the actual modern trend, will guide you to **chrome** or a **nickel** finish.
- In a room with darker (warm) colors with a more traditional decoration, your choice will go more for a **gold** finish that will bring to your dressing table a final luxury French touch that you deserve.
